

BUNKER DISCHARGE MACHINE

BUNKER DISCHARGE MACHINE FUNCTIONAL DESCRIPTION

WTW's Bunker Discharge Machine (BDM) is purpose-built to extract wet, cohesive, coarse, and abrasive non-free-flowing bulk materials from a wide range of storage types, including bunkers, hoppers, bins, silos, stockpiles, and dome-type storages. Equipped with rotating discharge arms, the BDM efficiently reclaims bulk material from bunker shelves and transfers it to a conveying system. The machine's self-propelled design enables automatic travel through tunnels beneath the stored material, ensuring seamless and reliable operation.

Available in a variety of configurations to suit diverse applications, the BDM's discharge system features six logarithmic-shaped arms for consistent and controlled material flow. These arms are bolted to a robust hub, secured with a shrink disk, and connected to the reducer's output shaft for optimal performance. Lined with wear-resistant plates, the discharge arms are engineered for extended durability, even when handling abrasive materials.

WTW's Bunker Discharge Machine sets the industry standard for reliability in continuous operation. With precision-engineered designs and proven performance, the BDM is the trusted solution for the toughest material handling challenges.

WHO WE ARE

At WTW Americas, we lead the industry in designing precision-engineered, heavy-duty bulk material handling equipment. Our German-engineered solutions deliver unmatched reliability and operational efficiency to industries like cement, power, mining, and environmental sectors, making us the trusted choice for advanced material handling challenges.

BLOCK - TECHNICAL DATA

Discharge capacity 5,0 3,500 t/h

Diametre of discharge wheel D1 (mm)	L1(mm)	L1 (mm)	L3 (mm)	L4 (mm)	H1 (mm)	H2 (mm)	H3 (mm)
2000	350	1300	700	500	1000	200	600

INDUSTRIES OUR PRODUCTS ARE BUILT FOR

- GYPSUM
- CEMENT
- POWER
- ALTERNATIVE FUELS
- MINING
- CHEMICAL
- FOUNDRIES
- ENVIRONMENTAL PROTECTION
- SLUDGE & WASTE HANDLING
